

Handout #20

CDC+ Emergency Back-up Plan

Participant Name: Johnny Sample Participant ID #: 0011111

In order to participate in CDC+, every participant must develop an emergency back-up plan before his or her first purchasing plan can be approved. The emergency back-up plan must address the following questions. This plan is to be updated annually during the support planning process.

What would you do if a primary provider of a critical service failed to report to work or otherwise could not perform the job at the scheduled time and place?
Each critical service is identified on the purchasing plan with 2 authorized Emergency Backup providers
What would you do if you experienced a personal emergency (e.g., a house fire, an accident in which you were injured, or loss of a loved one)?
My family would step in to assist me however needed
What would you do if there were a community-wide emergency (e.g., requiring evacuation)?
My family and I have discussed this and have an emergency plan in place, we know the evacuation route for our area
What would you do if an unexpected shortage of funds were to occur (e.g., if state budget shortfalls required a severe cut in program funds)?
My extended family members would provide the necessary services to meet my needs and goals.
If you have selected a Representative to help you with CDC+, how would you manage the program if your Representative told you he or she could no longer act as your Representative? You would have to arrange for a new Representative who could be trained and start helping you within 30 days.
my mother is my representative, my father or my sister would be willing to act as my representative when she is unable
