

## Provider Performance Scoring Methodology<sup>1</sup>

The record review portion of the PCR consists of the Service Specific Record Reviews (SSRR). The PDR includes the SSRRs as well as the Administrative record review and Onsite Observation Checklist, when appropriate. Each element in these tools was reviewed by the work group and placed into one of four categories, based upon the number of points the group determined the element to be worth. Point values were assigned as follows:

- 1 – Most elements
- 3 – Recoupment and/or recoupment like elements
- 4 – Elements that pertain to person centered processes, rights, or are core to the specific service
- 5 – Elements that pertain to health and safety

Weighted scores are calculated using a point value for all elements scored as Met divided by the total point value for all the elements scored. While the PCR does not receive an “overall” score, each SSRR receives a weighted score—a score for each service the person received at the time of the PCR. Therefore, if a person receives Companion and Personal Care Assistance, the PCR report will show a weighted score for each of these services.

A PDR report will show a weighted SSRR score for each service rendered by the provider (individual records); a weighted score for the Administrative review specific to organizational policies, procedures, training, and background screening requirements (employee records); and a score for the Onsite Observations, when applicable. All elements in the Observation Review Checklist are weighted as one (1). To calculate the scores for each of these components, the number of points for elements scored as Met is divided by the total number of points for all elements scored for that component, including all individual and employee records reviewed. For example, a provider offers ADT and Companion. If four records are reviewed for ADT and three records are reviewed for Companion, each of these is included when calculating the service specific score—results from the four records for ADT and the three records for Companion.

In addition, a weighted overall provider performance score is calculated using all three of these review components together, with the total number of points for elements scored as Met divided by the total number of points for all the elements scored. Results from all elements in each component are included in this overall score, using the point values assigned to each element.

Alerts are an important part of a provider’s performance, and many types of alerts are often not tied to a specific element. Therefore, with a few exceptions as noted below, they are not included in the weights for

---

<sup>1</sup> The scoring methodology was developed in May 2010 by a workgroup consisting of representatives from the Agency for Health Care Administration, the Agency for Persons with Disabilities, and Delmarva Foundation.

the scoring process for each component of the review. However, because situations that trigger an alert could seriously impact individuals receiving services, APD feels these should be incorporated into the overall performance score for the provider. Therefore, the overall provider performance score will first be calculated as described above. Each alert will result in a five (5) percentage point decrease in this score. For example, if the overall weighted score for the provider is calculated to be 85 percent, an alert will reduce that score to 80 percent. Each additional alert will result in an additional five point decrease, up to a maximum of 15 points per provider.

Four elements in the Administrative tool are directly tied to alerts, meaning when these are scored as Not Met they trigger an automatic alert. These elements will be treated as an alert in the scoring methodology and have a weight of one (1). These are:

- The provider has completed all aspects of required Level II Background Screening.
- 11. If applicable, the provider received training in Medication Administration per FAC 65G-7.
- 12. If applicable, the provider has been validated on medication administration per FAC 65G-7.
- 62. Drivers of transportation vehicles are licensed to drive vehicles used.
